

Jobins Jose

Chicago, IL | 224-258-8027 | jobins.jan20@gmail.com

PROFESSIONAL SUMMARY

Data Analyst / Data Scientist with hands-on experience in machine learning, predictive modeling, data analysis, and dashboard development using Python, SQL, Power BI, and Excel. Experienced in building end-to-end analytics solutions including machine learning model deployment, fraud detection analytics, and customer segmentation dashboards. Strong foundation in data preprocessing, exploratory data analysis, feature engineering, and translating data into actionable business insights.

TECHNICAL SKILLS

Programming Languages Python, SQL, R, Java

Data Analysis & Visualization Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI, Excel (Pivot Tables, VLOOKUP/XLOOKUP, IF Functions, Dashboards)

Machine Learning Scikit-learn, XGBoost, TensorFlow, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Databases MySQL, MongoDB, SQL Joins, Aggregations, CTEs, Window Functions

Tools & Deployment Flask, Docker, Git, GitHub, Jupyter Notebook, Postman, Render

Analytics Concepts EDA, Data Cleaning, Statistical Analysis, Predictive Modeling, Customer Segmentation, RFM Analysis, Fraud Detection, Anomaly Detection

PROJECT EXPERIENCE

Medical Insurance Charges Prediction

Live Application: <https://medical-insurance-cost-predictor-wyuu.onrender.com/>

- Developed an end-to-end machine learning model to predict insurance charges using demographic and lifestyle factors.
- Performed data preprocessing, exploratory data analysis, feature engineering, and hyperparameter tuning.
- Evaluated multiple machine learning models and achieved an R^2 score of 0.87 using XGBoost.
- Developed a Flask application with web-based prediction pages and REST API endpoints returning JSON responses.
- Containerized the application using Docker and deployed it on Render.
- Tested API endpoints using Postman and utilized SHAP to explain model predictions and feature importance.

Technologies: Python, Pandas, Scikit-learn, XGBoost, Flask, Docker, Render, SHAP, Postman

Bank Fraud Detection & Risk Analytics Dashboard

- Built an Excel-based fraud analytics dashboard using a financial transaction dataset.
- Performed data cleaning, feature engineering, and transaction risk scoring.
- Developed rule-based fraud detection logic using transaction patterns and balance inconsistencies.
- Designed KPI dashboards using Pivot Tables, charts, and interactive reporting elements.
- Identified high-risk transaction categories and supported fraud monitoring analysis.

Technologies: Excel, Pivot Tables, Data Analysis, Risk Analytics

Marketing Analytics & Customer Segmentation Dashboard

- Built SQL and Power BI dashboards to analyze customer behavior and marketing campaign performance.
- Applied RFM segmentation to classify customers into groups such as Champions, Loyal Customers, and At-Risk Customers.
- Created interactive dashboards tracking customer engagement, revenue contribution, and campaign effectiveness.
- Generated business insights to support customer retention and targeted marketing strategies.

Technologies: SQL, Power BI, RFM Analysis

EDUCATION

Eastern University Master of Science in Data Science 2024 – 2025 GPA: 3.92

Northeastern Illinois University Bachelor of Science in Computer Science Graduated: December 2023 GPA: 3.82

PROFESSIONAL EXPERIENCE

CVS Health – Mount Prospect, IL Data Entry Clerk February 2018 – Present

- Process and validate healthcare data across multiple systems while maintaining accuracy and compliance standards.
- Perform data quality checks and resolve inconsistencies to ensure reliable healthcare records.
- Collaborate with operational teams to support reporting workflows and maintain data integrity.
- Ensure HIPAA-compliant handling of sensitive healthcare information.

CERTIFICATIONS

IBM Data Science Professional Certificate (2023)
